ABOUT ME

As a third-year computer science student, I am passionate about developing my technical skills. Committed to mastering

- Programming fundamentals, algorithms, and data structures
- Collaborative group projects that enhance teamwork and problem-solving capabilities
- Hands-on learning through practical labs and real-world application development

Eager to grow technically and expand my professional capabilities in the ever-evolving field of technology.

PROJECTS

Portfolio

Role: Crafted and Coded

A personal website, crafted with HTML and CSS, showcasing my projects, skills, and achievements. Designed with a sleek, responsive interface.

Blog Verse ⎘

Role: Designed core pages and navigation

A React-powered web app for creating, managing, and sharing blog posts with intuitive interface, responsive design, and seamless user experience.

Nayi Disha

Role: Developed and Designed the Frontend

A Job Portal built with the MERN stack (MongoDB, Express.js, React, and Node.js) is a modern web application that connects job seekers and employers.
